## Digital Technology Overview

### Term 2

### Term 2 Learning

Digital Technologies in Term 2 is focused on giving students the knowledge, understanding and skills through which they can safely and ethically exploit the capacity of information systems.

*Each year level will focus on:*

**Year 1:** What information is private and shouldn't be shared online? How do I use the Chromebook?

**Year 2:** What information is private and shouldn't be shared online? How do I use the Chromebook?

**Year 3:** How can I apply safe practices to protect myself and others while working online? What ICT skills do I need to improve?

**Year 4:** How can I apply safe practices to protect myself and others while working online? What ICT skills do I need to improve?

**Year 5:** What are digital systems? What is a network?

**Year 6:** What is digital citizenship? How can I research online effectively?

#### **How you can support learning at home...**

When cooking or making craft at home talk about making steps precise and clear to reinforce the concept of computational thinking.
