

Maribyrnong Primary School

Digital Technology Overview

Term 4

Term 4 Learning

Over the course of the term in **Digital Technology** students will cycle through the main concepts underpinning the curriculum:

- Representation
 - Computational Thinking
 - Data
 - Algorithms
 - Digital Systems
 - Online Safety
- As part of our spiralling curriculum, we will revisit each learning concepts from throughout the year and build on those foundations, deepening student understandings as they finish off their year.
 - Students will have the opportunity to learn through play by using some of our robotics we have available at Maribyrnong, giving them the opportunity to demonstrate their understandings on a practical level.
 - We will continue to practise ICT skills such as typing and using a Chromebook.

How you can support learning at home...

Visit the eSafety Commission Parent page to learn about keeping your children safe online
